Subject Index of Volume 172

Adhesion
new insights into adhesion and lubricating properties of graphite-based transfer films, 85
Air flow
investigations of the effect of inertia on flow of air through porous bearing sleeves, 73
Alloys
wear characteristics of Al–Si alloys, 49
wear behaviour of rapidly solidified $Fe_{68}Cr_{18}Mo_2B_{12}$ alloys, 135
Alumina
grain size effects on the wet erosive wear of high-purity polycrystalline alumina, 41
Aluminium
wear characteristics of Al–Si alloys, 49

Ball bearings
preload–service life correlation for ball bearings on machine tool main spindles, 79
Benzotriazole derivatives
a study of S-(1H-benzotriazol-1-YL)methyl N,N-dialkyldithio-carbamates as novel multifunctional oil additives, 59
Boundary lubrication
evaluation of the interface at boundary lubrication using the measurement of electric conductivity, 29

Ceramics
microstructure and tribological properties of ZrO_2 ceramics, 111
factors affecting wear of ceramic balls, 191
Chromium carbide coatings
the synergistic effects of Mo as an alloy element added to chromium carbide coatings on their lubrication properties at high temperatures, 147
Contacts
evaluation of the interface at boundary lubrication using the measurement of electric conductivity, 29
a study of transitional friction behavior at scaled micro contacts, 99

Elasticity
modeling and simulation of elastic and friction forces in lubricated bearings for precise motion control, 155
Electrical conductivity
evaluation of the interface at boundary lubrication using the measurement of electric conductivity, 29
Erosion
grain size effects on the wet erosive wear of high-purity polycrystalline alumina, 41
External gear pumps
wear in external gear pumps: a simplified model, 121

Fractal analysis
fractal analysis of worn surfaces, 127
Friction
a study of transitional friction behavior at scaled micro contacts, 99
modeling and simulation of elastic and friction forces in lubricated bearings for precise motion control, 155
influence of plastic strain on friction in sheet metal forming, 167

Gas journal bearings
stability of high stiffness gas journal bearings, 175
Grain size
grain size effects on the wet erosive wear of high-purity polycrystalline alumina, 41
Graphite
new insights into adhesion and lubricating properties of graphite-based transfer films, 85
Grinding
factors affecting wear of ceramic balls, 191

Hard disk drives
contact start/stop characteristics on photolithographic magnetic recording media, 65
Hydraulics
wear in external gear pumps: a simplified model, 121

Inertia
investigations of the effect of inertia on flow of air through porous bearing sleeves, 73

Journal bearings
a study of wear characteristics of journal bearings operating under mixed-lubrication conditions, 11
the lubrication of conical journal bearings with bi-phase (liquid–solid) lubricants, 23

Liquid–solid lubricants
the lubrication of conical journal bearings with bi-phase (liquid–solid) lubricants, 23
Lubricated bearings
modeling and simulation of elastic and friction forces in lubricated bearings for precise motion control, 155
Lubrication
mixed lubrication model for microbearings containing microasperities of defined geometry, 1
a study of wear characteristics of journal bearings operating under mixed-lubrication conditions, 11
the lubrication of conical journal bearings with bi-phase (liquid–solid) lubricants, 23
a study of S-(1H-benzotriazol-1-YL)methyl N,N-dialkyldithio-carbamates as novel multifunctional oil additives, 59
the synergistic effects of Mo as an alloy element added to chromium carbide coatings on their lubrication properties at high temperatures, 147
wear study under plastic deformation conditions, 185

Machine tools
preload–service life correlation for ball bearings on machine tool main spindles, 79
Magnetic recording media
contact start/stop characteristics on photolithographic magnetic recording media, 65

Metal forming
influence of plastic strain on friction in sheet metal forming, 167
Microasperities
mixed lubrication model for microbearings containing microasperities of defined geometry, 1
Microbearings
mixed lubrication model for microbearings containing microasperities of defined geometry, 1
Microstructure
microstructure and tribological properties of ZrO_2 ceramics, 111
wear behaviour of rapidly solidified $Fe_{68}Cr_{18}Mo_2B_{12}$ alloys, 135

Oil additives
a study of S-(1H-benzotriazol-1-YL)methyl N,N-dialkyldithio-carbamates as novel multifunctional oil additives, 59

Plastic deformation
wear study under plastic deformation conditions, 185
Plastic strain
influence of plastic strain on friction in sheet metal forming, 167
Porous bearing sleeves
investigations of the effect of inertia on flow of air through porous bearing sleeves, 73

Shakedown
shakedown limits in sliding contacts on a surface-hardened half-space, 197
Silicon
wear characteristics of Al–Si alloys, 49
Sliding
dynamics of sliding in a spring–block experiment, 93
Sliding contacts
shakedown limits in sliding contacts on a surface-hardened half-space, 197
Sliding wear
wear behaviour of rapidly solidified $Fe_{68}Cr_{18}Mo_2B_{12}$ alloys, 135
Spring–block set-up
dynamics of sliding in a spring–block experiment, 93
Stiffness
stability of high stiffness gas journal bearings, 175
Synergistics
the synergistic effects of Mo as an alloy element added to chromium carbide coatings on their lubrication properties at high temperatures, 147

Tool wear
wear study under plastic deformation conditions, 185
Transfer films
new insights into adhesion and lubricating properties of graphite-based transfer films, 85
Tribochemical effects
factors affecting wear of ceramic balls, 191
Tribology
microstructure and tribological properties of ZrO_2 ceramics, 111

Worn surfaces
fractal analysis of worn surfaces, 127
